Correct. See Table 4 in QAPP for QC criteria.

Steve,

as far as you know, there is no SOP for acrylamide nor one for alkyl phenols, just this one for ethoxylated

alcohols and ethoxylated alkyl phenols. Correct? I just want to be sure I did not miss any guidance that I should have.

Thanks

Dave

Dave-

Here is the updated spreadsheet with changes as noted in Rick's email below.

If results for an analyte are rejected, then don't do an ADQ on it. For example, all ethoxylated alcohols were rejected with the exception of C15, so do an ADQ only on C15.

Thanks,

Las Vegas data has been placed on the L: drive.

As requested Steve, I modified the summary spreadsheet: v1 is on the L: drive. The changes in v1 include:

- 1) R flags added to some of the ethoxylate compounds.
- 2) Changes of U flags on the ALS, Las Vegas, R3, and TestAmerica tabs.
- 3) Addition of some notes describing R flags on the Ethoxylate tab and the low MW acids tab.

Thanks,  
Rick

Dave-

All data packages but LV data has been sent to Neptune. They are working all weekend. They will send me draft reports as they complete analytical suites. I have received a draft report on several analytical suites which I have been trying to review, hope to do today. We (QA) have to review these reports before we can forward to Rick. I noticed this morning the LV data package is on the Las Vega drive. I tried but I cannot copy it to our L drive Pavillion folder.

Rick-

Here is the path to the Las Vega folder: \\Aa.ad.epa.gov\ord\LAS\Data\Priv\NRP\_RD

Can you send me your updated spreadsheet to show what exactly has been rejected in the Las Vegas data so I can share with Dave the auditor? There is no point in doing an ADQ on rejected data.

I will email the LV data package this morning in increments so it will go through and not get hung up.

Thanks,

sv
